### FLOATING SCHOOL

There are around 2000 small islands in Sun Bay. Children from some of these islands go to an unusual school. It floats on the sea, so the children get to school by boat. The school floats on empty plastic containers and it goes up and down with the waves. Pupils can watch the sea through the holes in the floor.

School begins at eight. There is no bell, the sound of the drum starts the first lesson. The children study English, science, history and geography.

Vei is one of the students at this school. Her favourite school subject is geography.

At 11 o'clock the shop boat stops in front of the school. The teachers and the children can buy food there. At 12 o'clock the school is over.

### A YOUNG ARTIST

Alex is a 12-year-old boy. He is tall but not very slim. He lives with his parents in a small town.

When he goes for a walk, he always looks for bottles, tins and boxes. Then he makes earrings, lamps and even scissors for his friends.

Alex hasn't got a watch. He always asks his mum, "What's the time?" One day he finds some wire and makes his own clock – a sundial. He makes it in the shape of a chicken.

When it is his mother's birthday, he makes a birthday cake for her. But it isn't out of flour and eggs. He makes it from a beer can and olive oil tin. He puts some wire round the candle.

Alex likes comfortable clothes. He often wears orange trousers and a brown T-shirt. He uses bright colours while painting. He paints everywhere. He sometimes paints on toilet seats in their farmhouse. He paints toothy big-eyed monsters.

Alex also enjoys inventing things. He makes interesting toys such as miniature elephant chairs with a reading light.

He is a child with an artist's imagination. He has got a lot of fans, but they are all under six.
